Re: Medley Site

Dear Mr. Manning:

My client has made a thorough investigation of the materials that would have been present in the waste generated by the Charles S. Tanner Company that was taken to the Medley site. This investigation shows that the Tanner waste did not contain any of the six chemicals found by EPA at the site and identified in the "ten point memorandum." I enclose an affidavit from my client summarizing the investigation. I respectfully urge the United States to remove my client's name from the list of potentially responsible parties at the Medley site.

Sincerely,

Charles H. Tisdale, Jr.
